[Split-system air conditioners are designed to cool one specific place in your home. They work in a similar way as whole-house HVAC units. Split-system air conditioning units have an outside unit that dissipates heat from the area the system is cooling. The indoor part of the system blows cool air into the room.](#)

[What is a Split Air Conditioner? Split vs Packaged AC Units](#)

[The air blowing out of the air conditioner is not cold. Oil anywhere in sight, refrigerant is oil based so anywhere it leaks, will have oil. If you think you have a refrigerant leak, you will have to get a trained air conditioning repair technician to do the job for you. As the refrigerant is closely monitored by the EPA.](#)
